

LEAK TESTING THAT PROTECTS LIVES

Ensure Body Armor Integrity with
ASC BAIT

Why Leak Testing of bulletproof vests Matters ?

Ballistic materials like **Kevlar®**, **Twaron®** or **Gold Flex®** must remain **100% dry** to deliver certified protection. Even a micro-leak can let in moisture **compromising ballistic performance and putting lives at risk.**

✓ **The ASC BAIT : Precise. Fast. Clean.**

•Vacuum leak test (Dry method):

Replaces the long and complex water immersion test

•Detects Micro-Leaks:

Picks up leaks impossible to spot by visual inspection

•Rapid Results:

< 1min,

•Non-destructive test:

Suitable for large quantity, 100% production testing

•User-friendly:

Simple operation, no operator dependency

•Full Traceability:

Printable results and saved data available for reporting

•Audit-Ready:

Qualified equipment with certified leaks

ASC BAIT
test equipment

**Trusted by Defense
& Law Enforcement**

Use it on:

- New Bulletproof vest
- Bulletproof vest in Active Use
- Pre-Issue / Re-Issue for Operations
- Preventive Quality Control Checks
- Routine Quality Control Inspections

✓ **GO/NO-GO SIMPLICITY, WITH 100% CERTAINTY**

No interpretation. No guesswork. Just clear, documented results **on every single ballistic panel**
